

A large crowd of people is gathered for a protest. In the background, a red double-decker bus is visible. A person is standing on a large black banner that is being held up by the crowd. The banner has some text on it, which is partially obscured. The crowd is diverse in age and appearance. Some people are wearing hats and scarves. The scene is set in an urban area with trees and buildings in the background.

Palestinian – Israel Conflict 2000 – 2023

Analysis

By Amish Ilyas

Agenda

- ◇ Introduction
- ◇ Problem Statement and Tools
- ◇ Trends and Insights

Introduction

The Israeli-Palestinian conflict is a long-standing struggle over land, sovereignty, and political rights, primarily centered around issues like the status of Jerusalem, territorial borders, and the displacement of Palestinians. Since the Second Intifada in 2000, the conflict has caused thousands of deaths, including civilians and children.

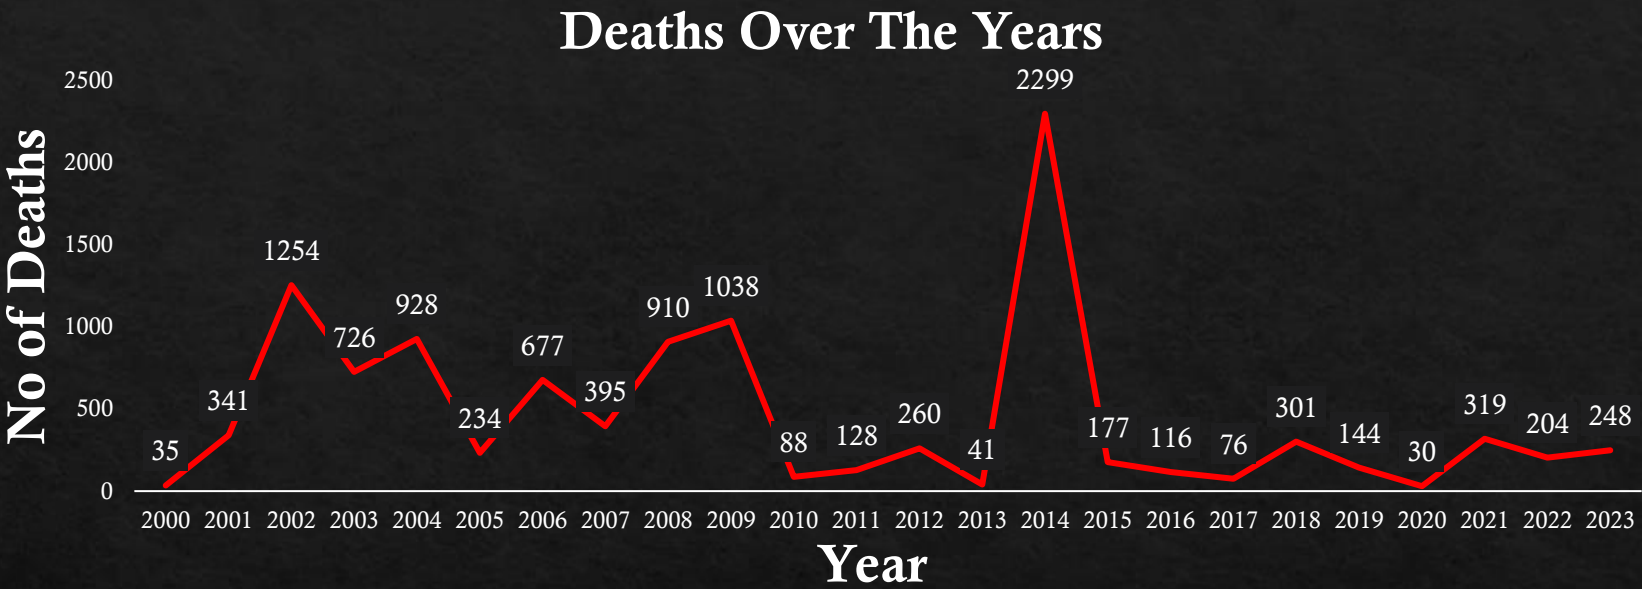

This analysis explores patterns in the fatalities to better understand the **human impact** of the conflict — highlighting who was affected, where, and under what conditions.

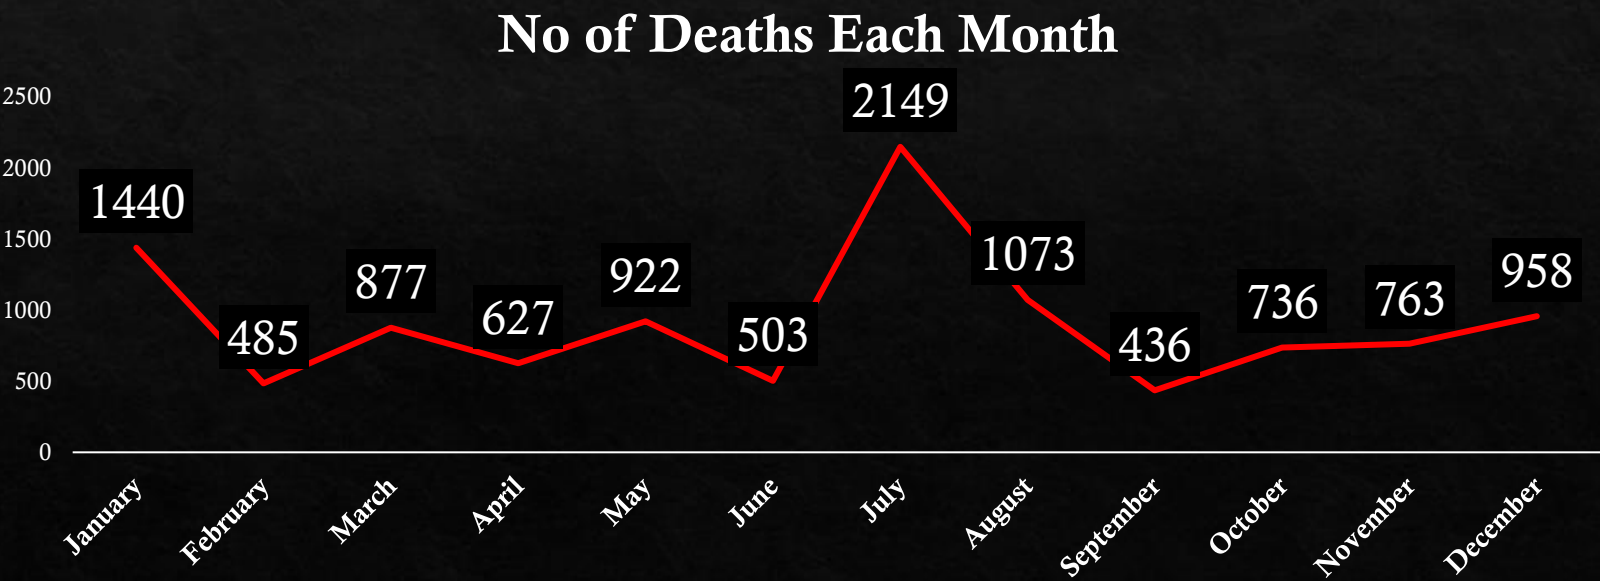

Problem Statement

Analyze the Israeli-Palestinian conflict fatalities since 2000 to identify patterns and trends across time, demographics, geography, causes of death, and ammunition used, with a special focus on civilian and child casualties

Total Deaths
10969

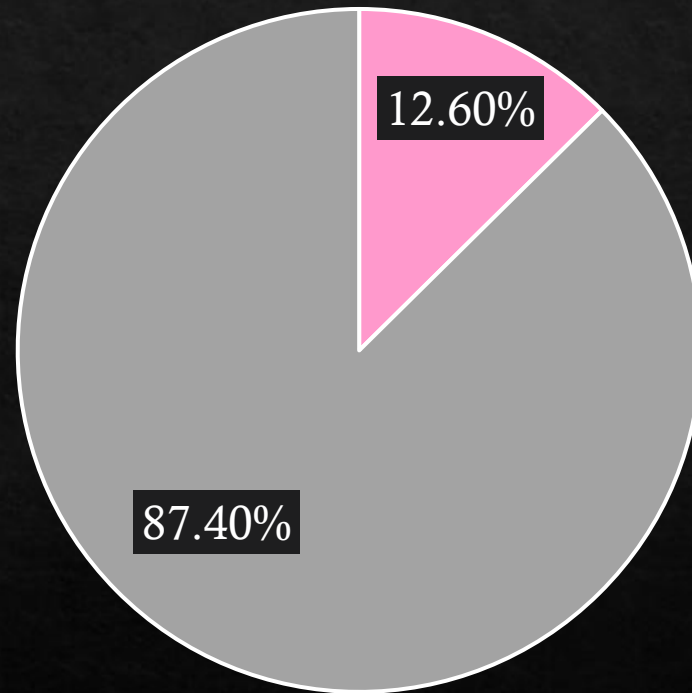

As the Conflict Begin in 2000 35 People Died. Fatalities peaked in **2014** with **2299** deaths, followed by a significant drop in 2015. Till Now

While September has least Deaths 436 and July has Most No of Deaths 2149
